Re: Permit Withdrawal Report
Appalachian Power Company
John E. Amos Plant
EPA I.D. No. WVD980554646

Dear Ms. Henry:

On November 17, 1980, Appalachian Power Company (APCo) submitted to U. S. EPA, Region III, a hazardous waste permit application for the above facility in accordance with the Resource Conservation and Recovery Act (RCRA). The application was submitted as a precautionary measure to obtain interim status; however, to date no hazardous wastes have been treated, stored, or disposed.

Since APCo does not anticipate on-site treatment, storage, or disposal in the future, we are hereby withdrawing the Part A application and will not file a Part B application. Any hazardous waste that may be generated will be accumulated on-site for ninety days or less for off-site disposal.

If you have any questions concerning this letter or the facility, please call me at (703) 985-2429.

Sincerely,

Edward L. Kropp
Environmental Affairs Director

Re: Permit Withdrawal Report
Appalachian Power Company
John E. Amos Plant
EPA I.D. No. WVD980554646

Dear Mr. Kramer:

Confirming our conversation of August 7, 1985, concerning your letter of August 5, 1985, (copy attached) requesting information under Section 3019 of RCRA, I am attaching a copy of correspondence dated February 23, 1984, in which Appalachian Power Company withdrew its RCRA Part A application for the referenced facility.

Since the facility withdrew from RCRA program without treating, storing, or disposing of hazardous wastes on-site, the information requested is not required.

If you should have further questions concerning this matter, please contact me at (703) 985-2376.

Sincerely,

Danny L. Gray, P.E.
Environmental Engineer Senior

Mr. R.E. Northup,
Environ. Aff. Dir.
Appalachian Power Co.
John E. Amos Plant
P.O. Box 2021
Roanoke, VA 24022

Dear Mr. Northup:

Section 3019 of the Hazardous and Solid Waste Amendments of 1984 establishes a program for the collection, reporting, and analysis of information on the potential human exposure from releases of contaminants from hazardous waste landfills and surface impoundments. Attached is the Permit Applicant's Guidance Manual for Exposure Information Requirements Under RCRA Section 3019. This manual provides the items that must be addressed in the Exposure Information Report (EIR) submitted by the applicant.

As can be seen from the attached, facilities that have submitted Part B applications, post closure permit applications, or closure plans are required, by statute, to submit the EIR by August 8, 1985. Please submit either all of the required information or whatever information you can obtain and a detailed schedule for getting the balance of information into EPA, Region III.

Any questions regarding specific information that must be submitted should be directed to Samuel Rotenberg (see appendix B). The EIR should be sent to me and a copy to the appropriate State agency (see appendix C).

EPA is aware of the short time frames and if there is anything that we can do to help, please feel free to call 597-3159.

Sincerely yours,

Robert Kramer, Chief
RCRA Support Section
